AAMI Connect is the exclusive online networking tool where members can ask advice, share expertise, and connect with other AAMI members. AAMI members have been automatically added, so take a look at your profile and start connecting with the AAMI community!

Getting Started
Log in and Join the Conversation
Go to www.aami.org/connect. Click the button at the top right where it says “Sign in”, and type in the same username and password you use for the AAMI website. If you do not remember your AAMI username and password please email membership@aami.org for assistance.

NOTE: Because AAMI Connect is integrated with our member database, you don’t have to remember more than one username or password.

Completing your Profile
Tell the Community Who You Are
We have used the information supplied in your membership application to complete basic parts of your profile, including your name, company and professional designations, but we know there is more you want to share.

Click on the “Profile” tab on the top green menu bar. From here, you can update your biography, education background, job history, add a picture and update your email subscription preferences. You can even update your profile using your LinkedIn account!

Privacy Settings: Limiting the information shared is easy! Just click on the “My Account” tab and choose “Privacy Settings” to choose what you would like to share with other AAMI Connect members.
Choosing Notification Settings
Let us know how often to alert you about community activity
Just click on the “My Account” tab and choose “Email Preferences”. In the “Community Emails” section select the “Configure Your Subscriptions” button to choose community-specific email preferences. Here are the basic email options for each community you belong:

- **Real time**: sends an email for each community post
- **Daily digest**: sends an email each morning with the previous day’s posts
- **No emails**: read and reply to posts through the community without email notification
- **Plain Text**: emails sent do not contain HTML formatting.

Getting Involved
This is your space – start a conversation!
Click the “Communities” tab and choose “My Communities”. You have been automatically added to the communities you were a member of in the former AAMI eForums discussion groups. You will now see a list of all of the communities you belong to. Click on the name of the community you would like to enter.

Clicking on a community's name will give you an idea of the activity within that group. Once inside a community you can see how many other members there are, how many discussions have occurred and if there are any shared resources in the community library.

Creating a Discussion Post
Join the conversation!
Choose “Post a Message” from the Latest Discussion Posts area tucked inside the community you want to post within.

Including Attachments:
Want to include an attachment? Choose the “Attach” button at the bottom of your drafted discussion post. Name the document and then browse through your computer to select the appropriate file. Click “Upload” and the attachment will be added to your message.

Replying to a message:
When looking at the discussion message you want to reply to choose the blue “Reply to Discussion” button on the right and choose one of the options outlined below.

- **Reply to Discussion**- to reply to everyone in the group
- **Reply to Sender**- to reply privately to the original sender
